

Thermoplastic (TP) Training

Target group

Production managers and machine operators

Course objectives

Basic understanding of TP process engineering

Safe handling of TP materials

Optimal setting and operation of the machine

Content

Safety instructions

Handling of TP and equipment

TP Process engineering and material properties

Storage, preparation and processing of TP

Construction and function of the machine system

DEScan® - Interface, controls and buttons

Setting of injection and production parameters

Building up of moulds and optimizing items

For D622, D721 machines

Training details

Course duration: 3 days

Number of participants: max. 3 people

Dates: by arrangement

Location: at DESMA in Achim or at your location
